

Goat skins

New Zealand

The production in New Zealand is going thru the whole year.

The goat skins are 100% machine flayed, greenfleshed, trimmed and then drumsalted.

New Zealand goat skins are of good substance; usable for nappa as well as for velours.

Wetsalted goat skins

Size range: 5 to 8 sf

Selection: Tannery run, rejects out

Approx. 8'000 skins per 20' container

Pickled goat skins
